2024/05/12

Reference designator for sticker has been changed from SKn to STn.

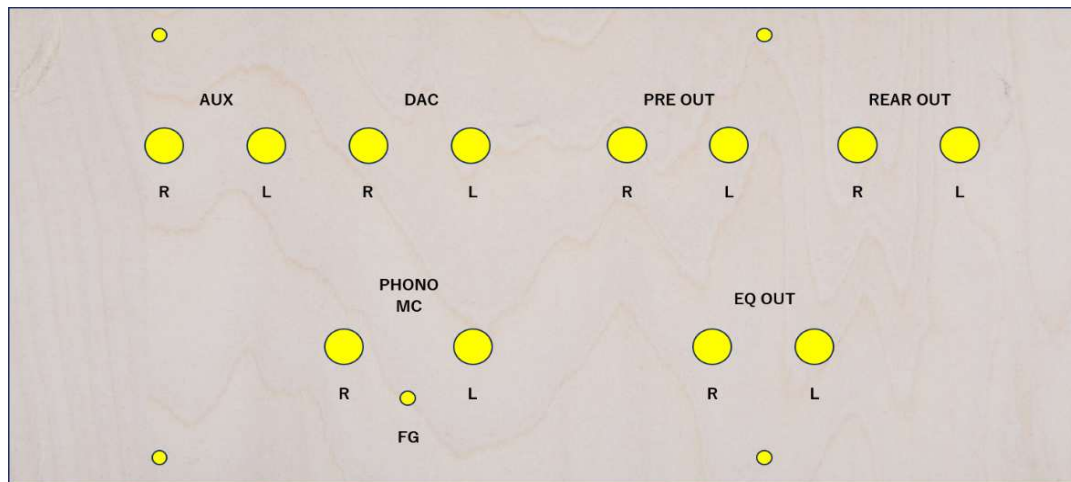

* ST3 - BackSticker_AMP

1. Create sticker on PowerPoint. (For how to create it, see the description of ST4)
2. Save the sticker image as "SK3_BackSticker_AMP_xxx.png" (xxx: name of material, e.g. sino, marble, etc).
3. Print the sticker image on A-one 28874N w/ printer.
4. Cut out the holes colored yellow (Phi3.5mm x5 and Phi9mm x12) in ST3 w/ punch and cutter

Dimension of ST3: 250 x 121mm 260.5 x 118mm

Plan-A

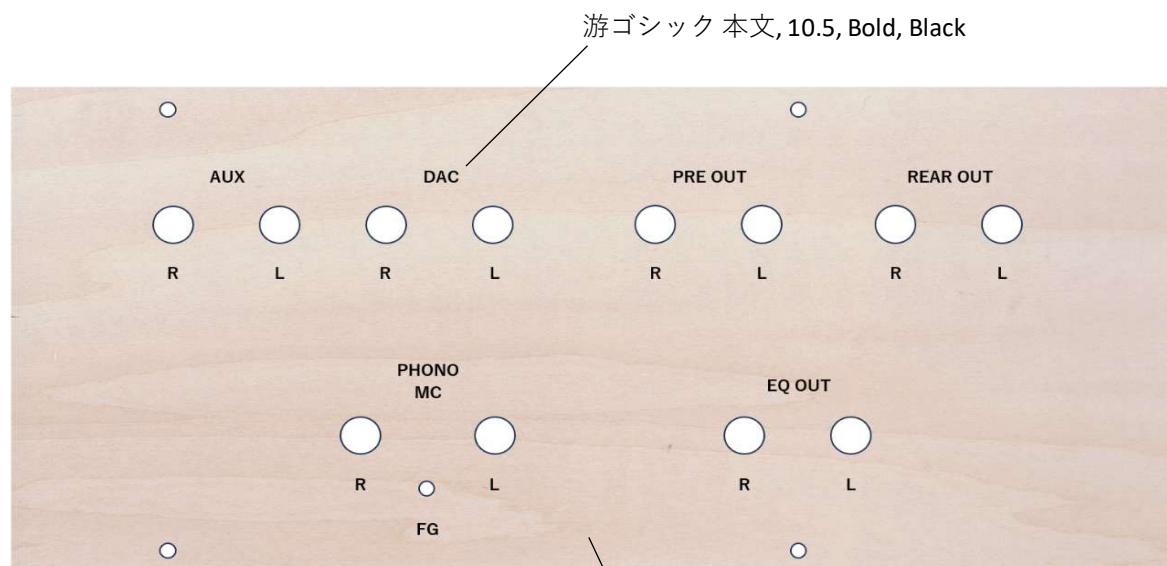

Plan-B

Plan-C

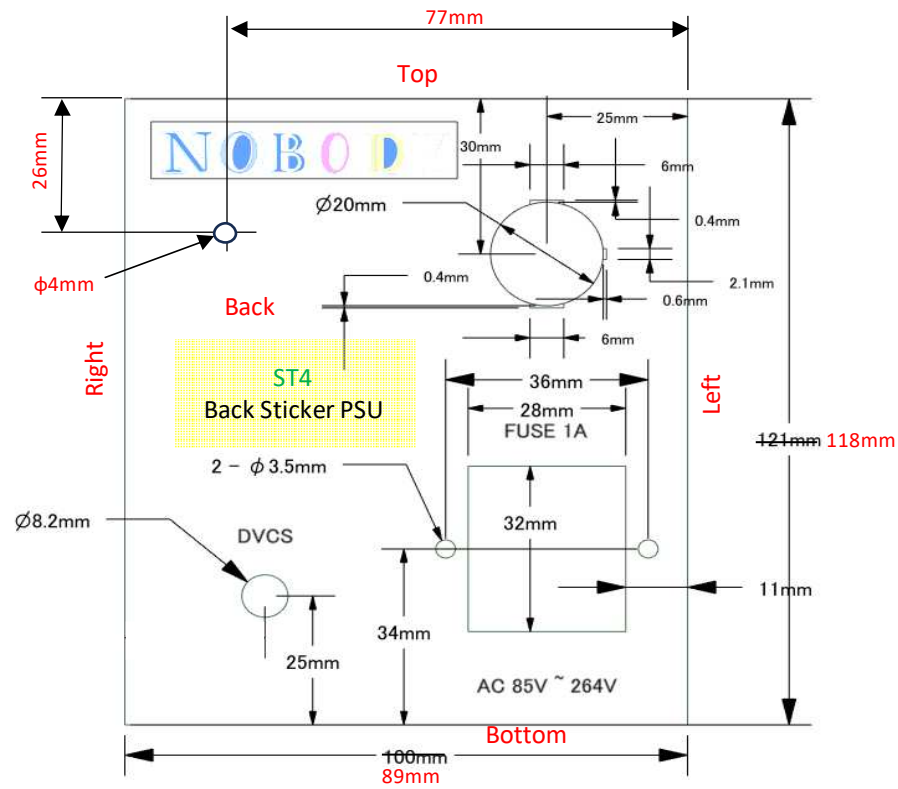

Final design

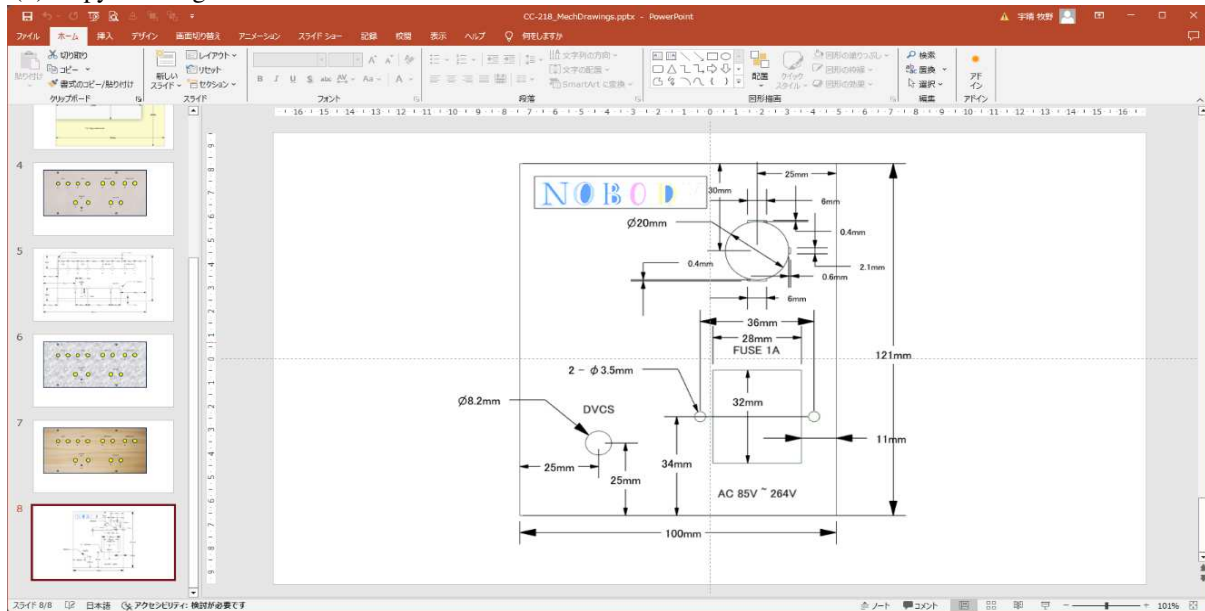

Sino grain scanned in 1200 x 1200 dpi

* ST4 - BackSticker_PSU

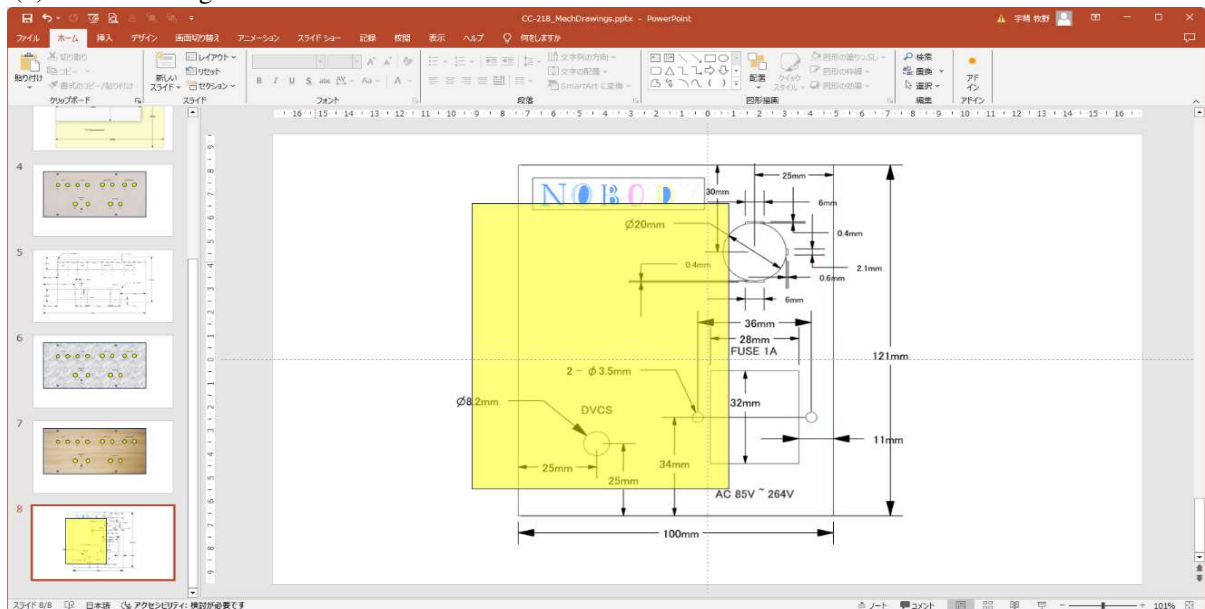

1. Create sticker on PowerPoint.

(1) Copy the image created on CAD on a slide of PowerPoint.

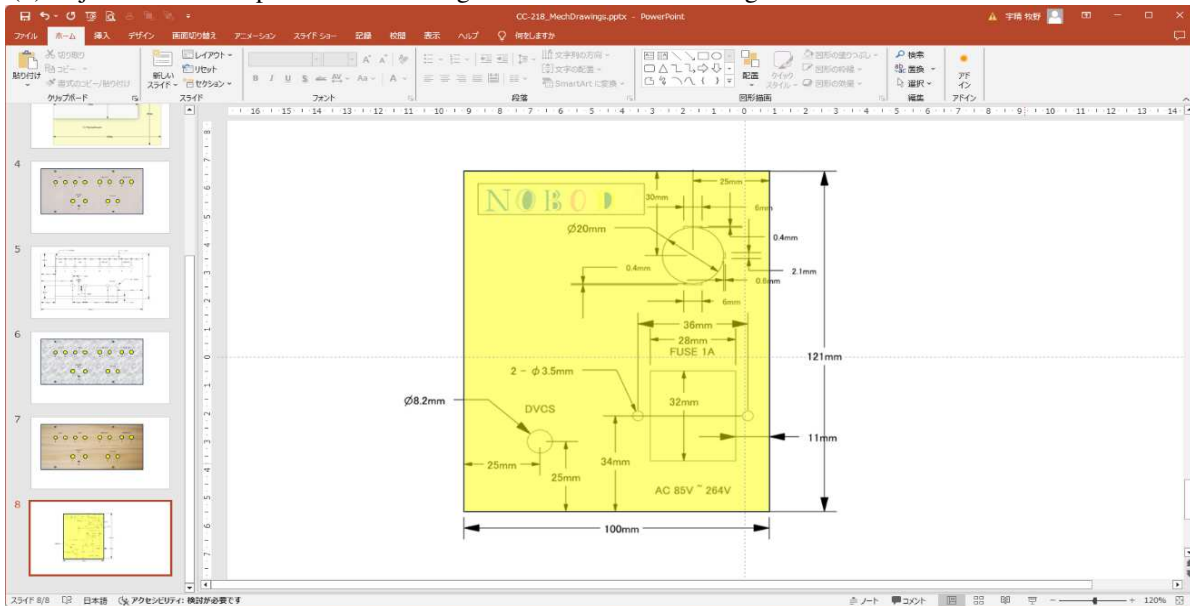

(2) Make a rectangular of the same size as the sticker.

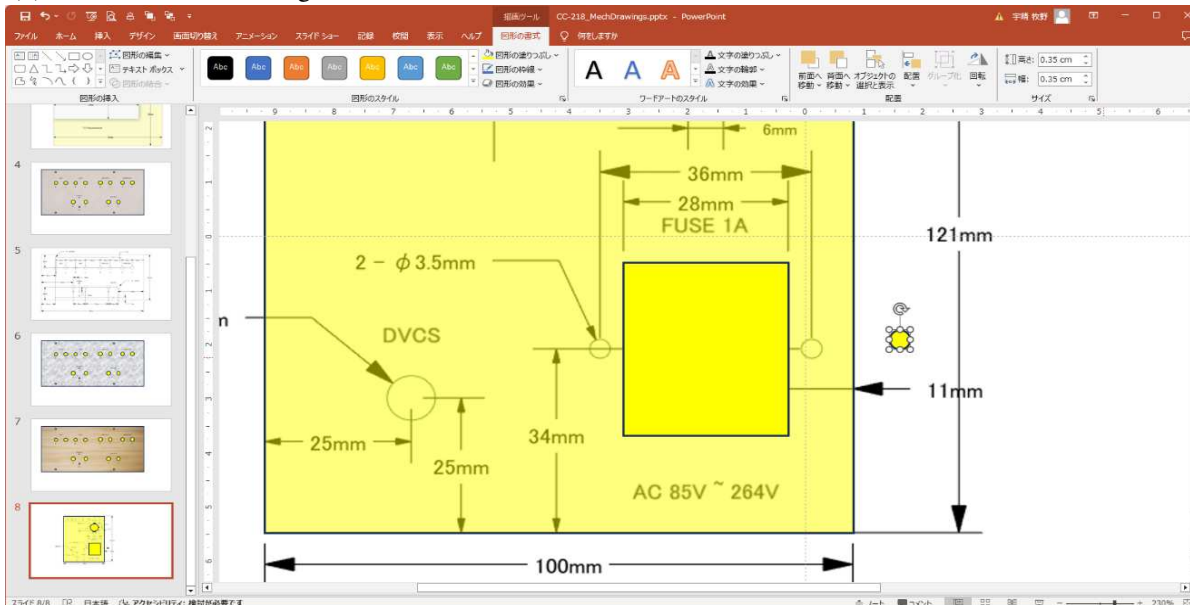

Color the rectangular yellow with the transparent of 50%.

(3) Adjust the size and position of the image to the same as the rectangular.

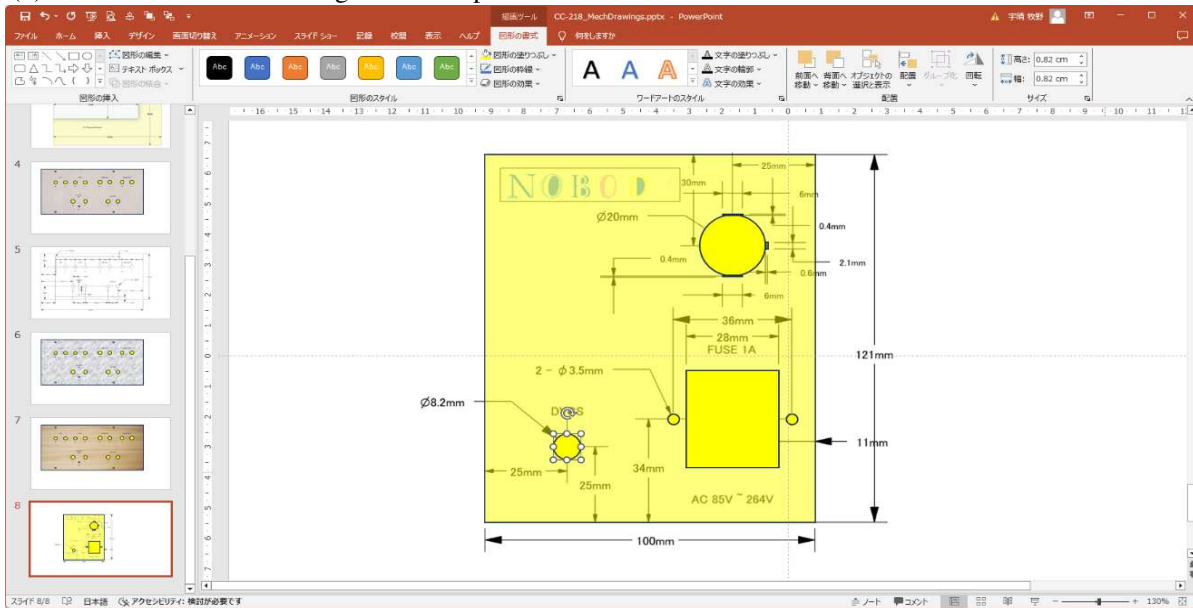

(4) Make circles and rectangulars whose sizes are the same as the cutouts of the sticker.

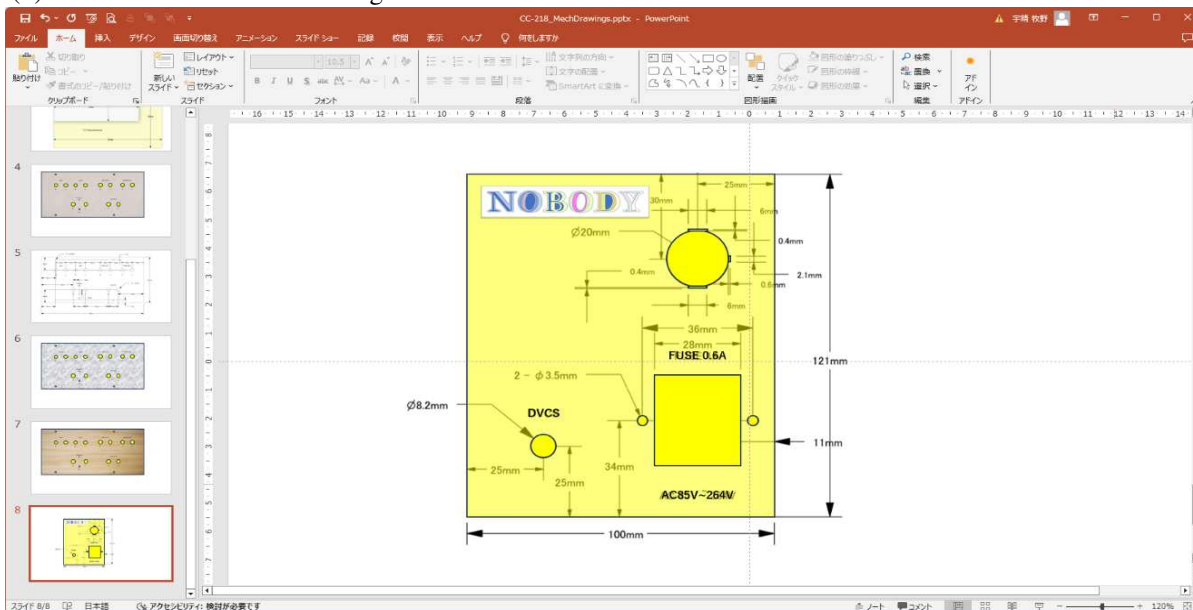

Color the circles and rectangulars to yellow. The frame was black.

(5) Place the circles and rectangulars to the positions of the cutouts.

(6) Make textboxes w/ the letterings.

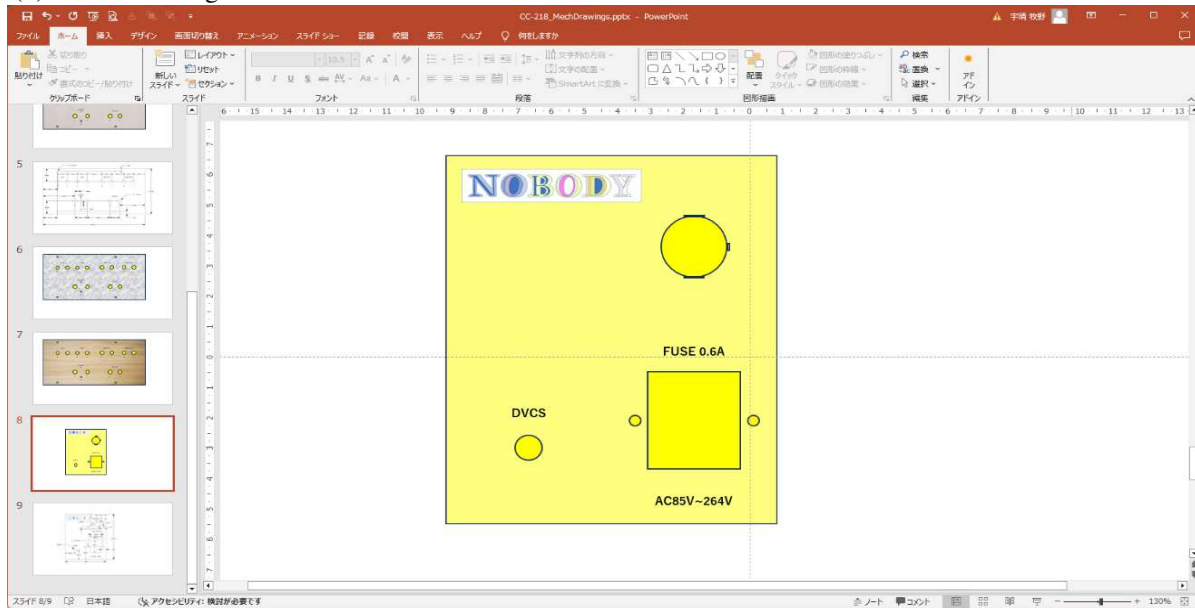

The color of the frames is black.

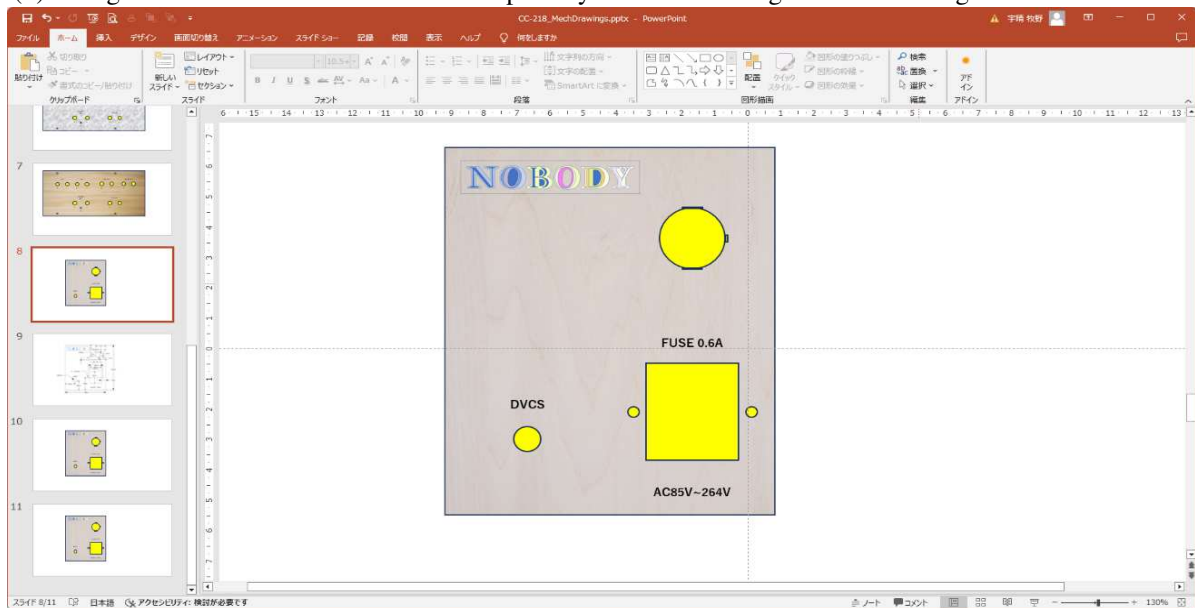

The textboxes have no color (transparent)

The value of the fuse has been changed from 1A to 0.6A.

(7) Delete the image created w/ CAD

(8) Changed the color of the sticker from transparent yellow to a wood grain or something like that.

Import a picture of the wood grain and pasted on the sticker.

2. Save the image as a picture file.

Filename: ST3_BackSticker_PSU_Sino_Final.pnp

~~xxx: surface image of the sticker like sino, marble, etc~~

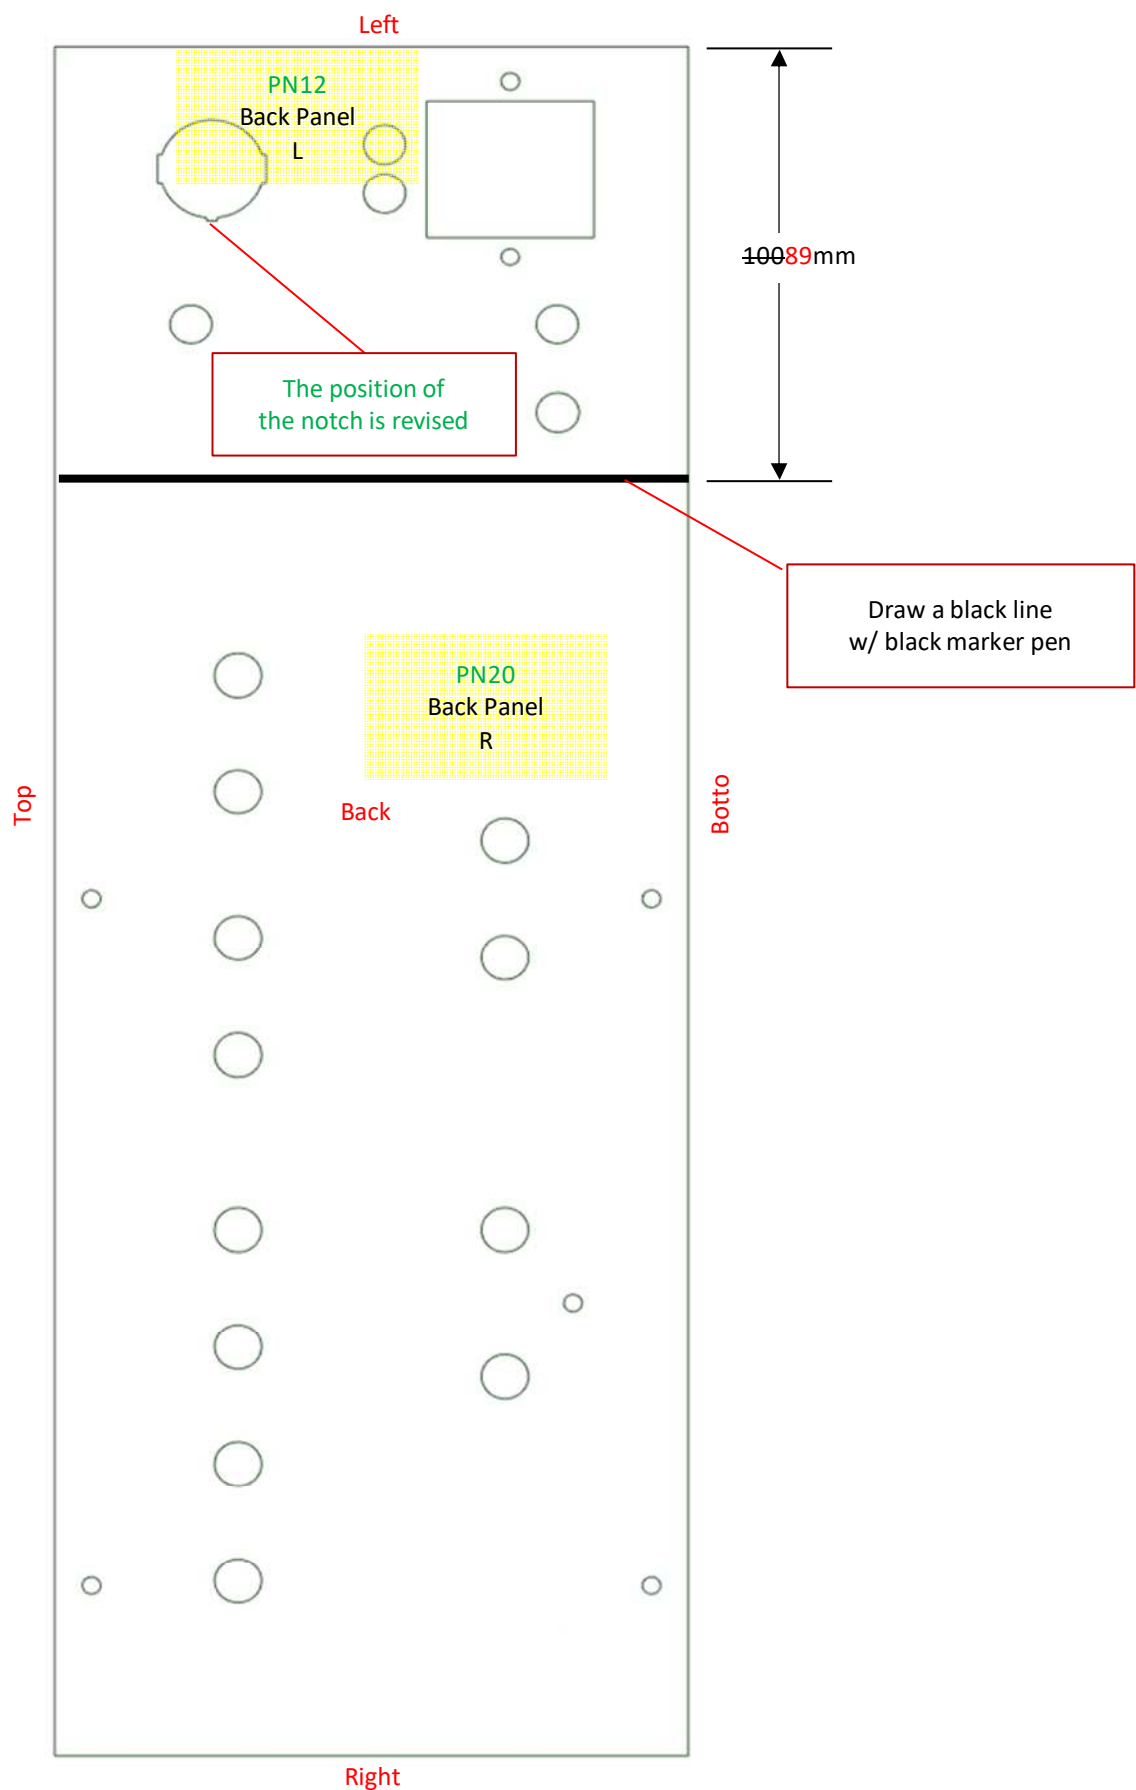

3. Print sticker w/ printer.

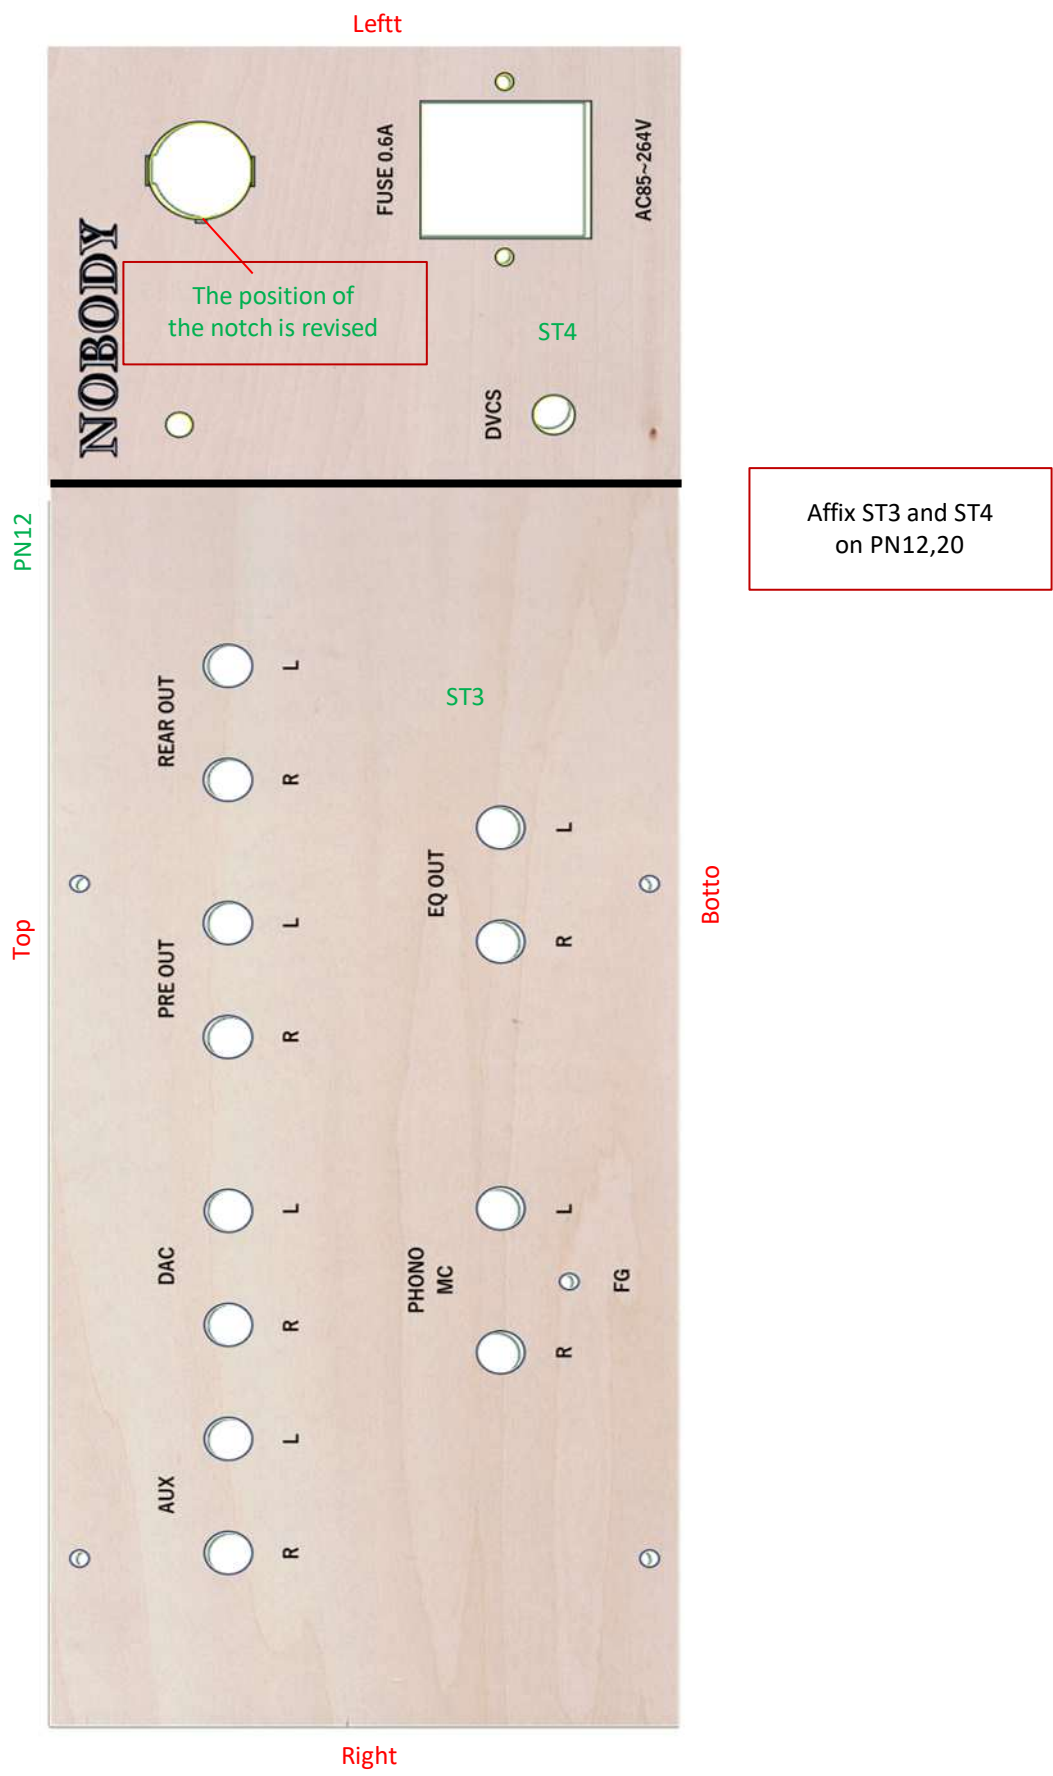

Sticker paper: A-one #28874N

Print the image in the real size.

4. Cut out the holes colored yellow (Phi20mm, Phi8.2mm, Phi3.5mm x2, 28x32mm) in ST4 w/ punch and cutter.

* PN12,20 - Back Panels

Front Panel

* Tools

(Zebra Mackie - black)

Cutter
(Zebra Mackie - black)

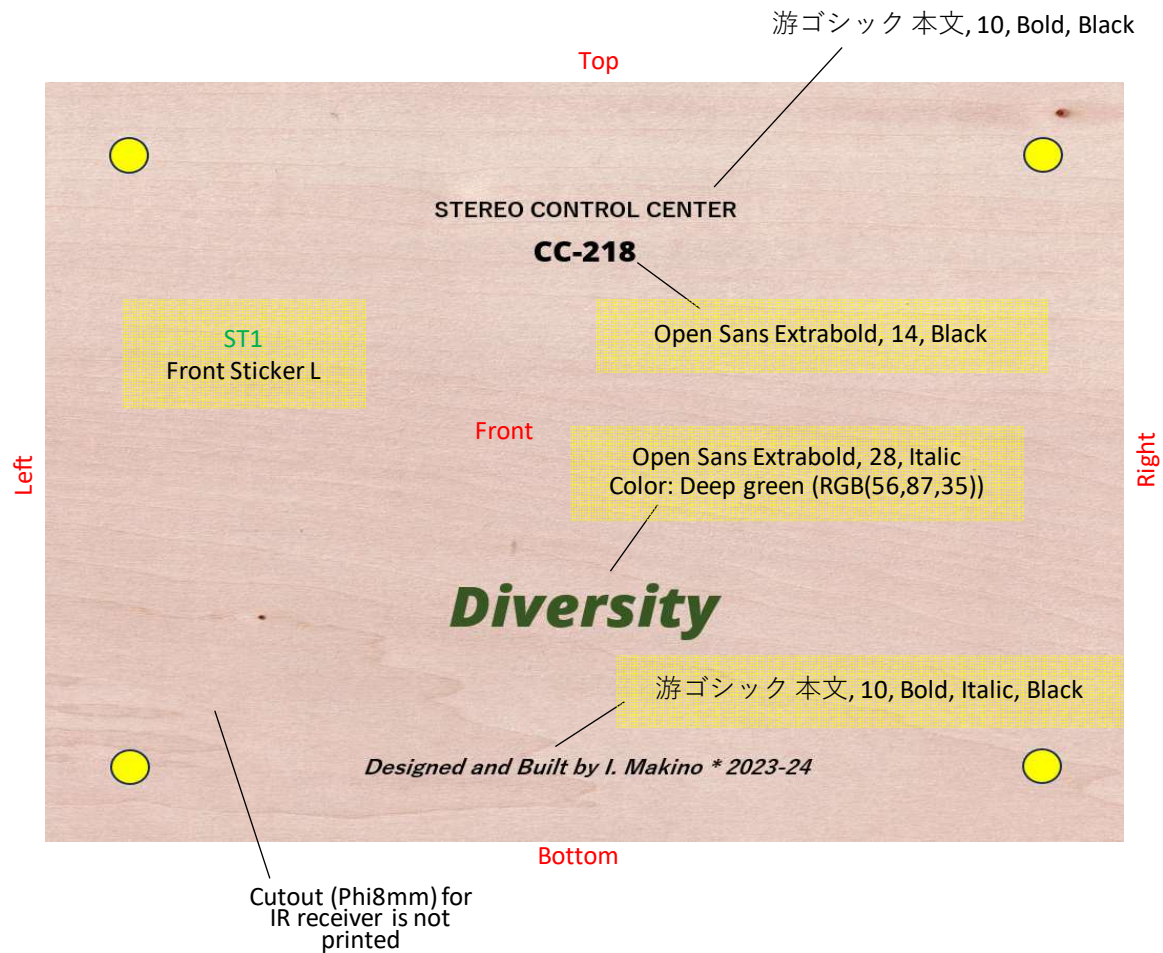

Printable sticker
(A-one 28874N)

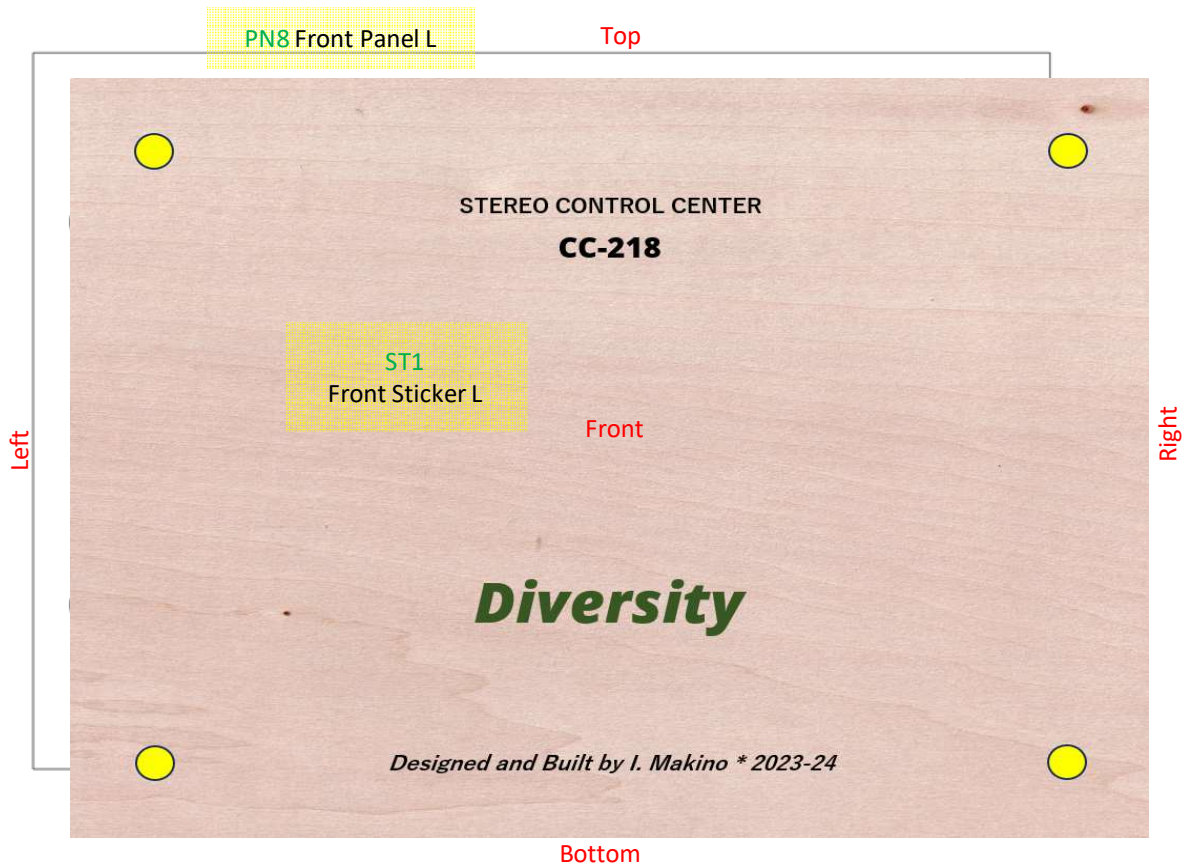

* ST1 - FrontSticker_L

1. Create sticker on PowerPoint. (For how to create it, see the description of ST4)
2. Save the sticker image as ST1_FrontSticker_L_XXX.pnp (XXX: name of material, e.g. sino, marble, etc)
3. Print the sticker image on A-one 28874N.
4. Cut out the sticker.
5. Cut out the holes colored yellow (Phi6mm x4) in ST1 w/ cutter.

6. Affix ST1 on PN8.

7. Cutout the hole (phi8mm) w/ cutter.

* ST2 - FrontSticker_R

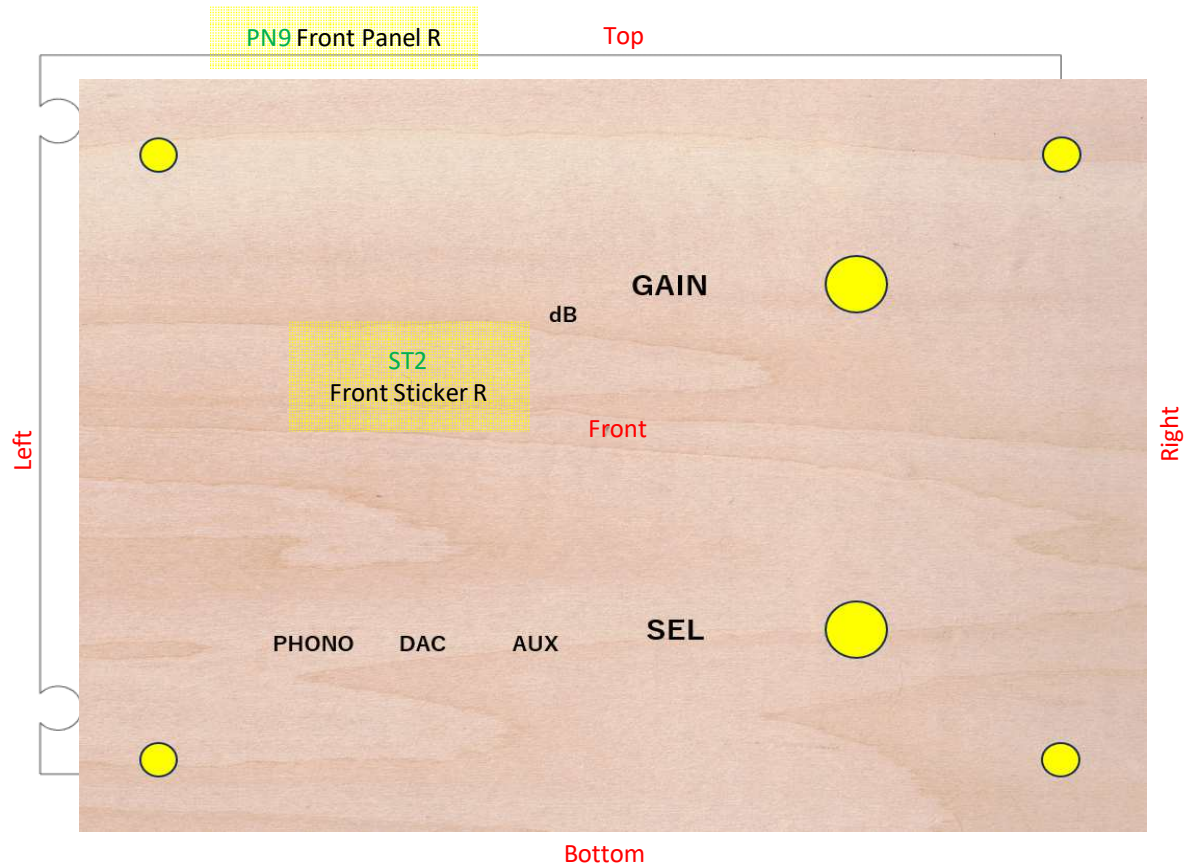

1. Create sticker on PowerPoint. (For how to create it, see the description of ST4)
2. Save the sticker image as ST2_FrontSticker_R_XXX.pnp (XXX: name of material, e.g. sino, marble, etc)
3. Print the sticker image on A-one 28874N.
4. Cut out the sticker.
5. Cut out the holes colored yellow (Phi6mm x4 and Phi10mm x2) in ST2 w/ cutter.

Top

6. Affix ST2 on PN9.

Knobs*** Tools**
